

User Manual: SmartHome Thermostat X200

Date: May 2025

Manufacturer: ThermoTech Pvt. Ltd.

Overview:

The SmartHome Thermostat X200 is designed for modern smart homes to help reduce energy consumption. It supports Wi-Fi connectivity, voice control with Alexa and Google Assistant, and machine learning-based temperature adjustment.

Key Features:

- Wi-Fi and Bluetooth connectivity
- 5-inch touchscreen display
- Weekly scheduling and auto-learn mode
- Compatible with most HVAC systems
- Energy usage analytics

Installation Steps:

1. Turn off the power to your HVAC system.
2. Remove the old thermostat.
3. Mount the X200 base plate using the provided screws.
4. Connect wires as per the label.
5. Attach the X200 unit and restore power.
6. Follow the on-screen instructions to configure the device.

Troubleshooting:

- If the screen is blank, check the C-wire connection.
- For connectivity issues, hold the reset button for 10 seconds.
